CLOISONNE ENAMELED EMBLEMS

Attractive, full-color pins custom made to your particular specifications in almost any shape or design.

The art of Cloisonne is relatively simple in description: it begins with cutting a hardened steel die to your design, from which metal planchets are stamped. The recessed portions of these blanks are then filled with a paste made from colored ground glass which, when fired at 1400 degrees, produces a flint-hard and brilliant finish...vitreous enamel.
